

Dr. Bacher is very knowledgeable and enthusiastic about the statistical analysis of genetic data (and biostatistics in general). She held weekly office hours for students in which we could ask questions about the class and discuss how course topics relate to the COVID-19 pandemic. Dr. Bacher closely listened to all questions and responded thoughtfully and clearly. Dr. Bacher assigned regular discussions and quizzes in order to make sure that students were on pace with the course and clearly understanding the most important concepts. The homework assignments were enjoyable and greatly added to my understanding of the course material. The readings Dr. Bacher posted were all interesting and informative. Dr. Bacher truly went above and beyond to make sure that this was an extremely positive learning experience. I enjoyed taking Dr. Bacher's class, and I look forward to working with her more in the future.

The professor Bacher was very enthusiastic, professional and responsible. She would always explain the knowledge points into great detail and showed us the processes of calculation.

Prof. Bacher is very kind and helpful. She tried to help and answer when I had questions about the homework or class materials in general, even not in her office hours.

She was always available and gave reliable office hours. She was one of the best online professors I had in the entire program. If more professors in the all online program were like her, the online program would be so much better. The COVID-19 pandemic started during our semester. I work in healthcare and she was completely understanding with regard to our deadlines.
